

Case Studies of the UPACHP

Taffy the Pony – Melissa R., Melbourne, Australia

Taffy, our 23 year old pony, suffered a severe leg injury just above her knee with no clues as to what had occurred. At first it appeared she had broken her leg as she would not even let her toe rest on the ground and the huge amount of pain she was in. The vet determined it wasn't a break after all, but a very serious tear between the muscle and ligament - a very difficult area to heal due to the movement involved. We began treatment with pharmaceutical painkillers and anti-inflammatories to try and reduce the pain and swelling as quickly as possible, along with compression bandages to reduce the amount of fluid that could build up in the area.

By the second day I began using the UPACHP and placed the healing image under her water bucket. During the course of the next few days she became significantly worse with the swelling increasing substantially and the vet becoming concerned that it may be a bone break after all. At this stage I have to say I was fairly concerned about using the UPACHP due to the deterioration in her condition which was far more than would normally be expected.

On day six we had a different pony on our hands. Taffy had very suddenly shown a dramatic improvement in her symptoms, the swelling was reducing and she had begun to place the toe of her hoof to the ground for the first time. At this stage I took her off the drugs and placed her on herbs, homeopathics, high dose vitamins and minerals, and anti-inflammatory enzymes to reduce her pain and encourage healing and repair.

Over the course of the next week the swelling continued to reduce very quickly and by the end of week two she was walking with a limp that made her appear stiff rather than hobbling in pain. To see an improvement like this in a young horse would be fabulous, but in an "old lady" this was simply phenomenal!

Taffy is now back to her old self and only has a very slight thickening in her lower tendons. Her movement is free and you could not tell of the injury she has recovered from, I never expected to see such a complete recovery.

Ziggy the dog– Arlene, Canada

Ziggy is a Maltese dog. We have had him for 11 years. He's not your typical dog. Ziggy didn't know how to play - he would never chase a ball, chew on a toy, play catch. He also had an aggressive side to him. Years ago, he bit me on the nose and finger. Then he got into growling and chasing people as they walked by him in the house. He wouldn't do it with everyone - just certain people. About 4 years ago he started to take seizures. When we got another dog (Emma), she taught him to play a bit. She would chase him, and he would chase her. But this was on rare occasions. My friend Melinda Knights sent me the Universal Pet and Animal Healing Profile and Transmission that she and Bill Austin have been working on. Shortly after using the hologram, I noticed Ziggy was calmer and didn't react to people as much as he used to. A couple of weeks ago, I had to take Ziggy to the vet. I gave him half of a rawhide strip and either part of it lodged inside his throat or scratched it or something and he was trying to clear his throat and making funny sounds. I rushed him to the Vet's and he wouldn't let the vet look in his mouth. Anyway, I bought him home, used the animal healing picture and transmission and he was fine afterwards (thanks be to God!). Then, there was a big change in Ziggy. He started acting like a puppy!! He amazed me with the way he was playing - because, he rarely (if ever) plays!!! The next day he was running around and jumping up. It was a complete change because in the days previous to that he looked like he was on the way out.

I am very grateful to Melinda for sending me the Universal Pet and Animal Healing Profile and Transmission and would like to thank her and Bill Austin for the wonderful work they are doing to help animals. Ziggy has really benefited from this work.

In Gratitude and Love,

Arlene & Ziggy in Canada

Merry the Goat – Melinda Knights, Melbourne, Australia

I applied the UPACHP in the early days of the development of this system to our goat Merry. Merry came to use with a very disturbed emotional state, and required a lot of intensive Usui reiki treatments to help her stay calm. Her behaviour was so unpredictable that she was dangerous to be around. I had for many months worked with various healers to assist Merry to clear the darkness around her energy field, and to help her to recover from whatever traumas were in her past so that she could experience peace again. The reiki definitely supported her, but there were so many aspects to her issues that I was really overwhelmed as to how to help her further, because what needed to shift obviously wasn't.

I decided to apply the UPACHP to her, and over the course of 24 hours much to my amazement, Merry's energy field shifted and changed completely from being clogged and stagnant with dark and unhealthy energy, to now radiating white light! She seemed to be in a state of peace and was so calm I was astonished. She actually looked me in the eyes as if seeing me for the first time, as if she understood me. Over the following 7 days our relationship changed dramatically. She was not only surrounded by light, but she was much more stable and grounded. She interacted with me in new ways and I also began to understand her differently – our entire relationship was transformed in an incredibly loving way. She began to trust me and listen to me, and our hearts were connected for the first time. Having an animal trust you after they have experienced trauma or abuse is no small feat!

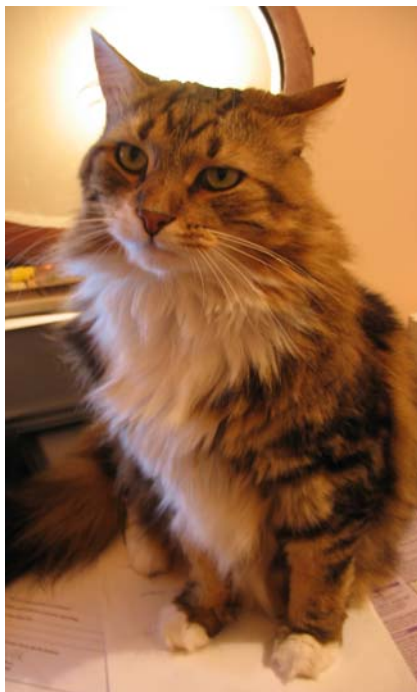

Over the following week I noticed her energy shift and change more, and she began to enjoy life, and concentrate on foraging and being a normal happy goat. I could not believe how much she changed in one week, especially since I had been working for months to achieve the same outcome with little results. To be honest, I really didn't have the knowledge to understand everything that was going on with her, or the knowledge to clear or heal it, even though in my heart I really wanted to. Since this time Merry has had some other ups and downs, as we have found her to be a very sensitive to sounds and easily upset by noises from the neighbourhood. I was very successfully able to help Merry further using the Crystalline Rainbow Reiki alongside the UPACHP, again getting fairly instant results.

Universal Pet and Animal Clearing and Healing Profile (UPACHP) Practitioner Manual

What impressed me most about the UPACHP is how much negative energy cleared from her, and how quickly our relationship and understanding of each other improved over such a short time. Merry continues to live a dramatically improved life, her energy field maintains the same degree of light, and our relationship and mutual understanding continues to grow. She now listens to me when I direct her, when previously she was so unpredictable that I was injured by her sudden movements. After years of heartache and stress helping adopted and rescued animals, I can only say that the UPACHP is blessing to all animals, and to the owners who so desperately want to help the animals in their care.

Messages from Animals

Enjoy some words of wisdom about the UPACHP and life in general from my animal companions.

Christos the cat

“Get out of your head and into your heart, its all love!

There are realms of love and many beings of high consciousness that inhabit different frequencies, these frequencies are what is used to help bridge animals vibrationally from where we are, to the higher light and love frequency. They are actually leading us into greater depths of love, so that we can continue to enact our service here to Gaia and to all the inhabitants on the earth. Actually we do alot of work for Gaia herself and we have been prepared for this for many aeons. We like the UPACHP because it helps us to enact our service here more gracefully, and it was prepared for us a long time ago, in plan anyway, to assist with this great shift the Earth is making. We are in many ways aspects of Gaia herself. We love Her like She is our body and soul and in many ways She is. We are here with Earth contracts, to help Gaia with the many shifts She is making, and also to be a part of something that is very grand, and this service of the UPACHP is very practical, because it helps us to clear all the things that prevent us from fully embodying love – such as our mental and emotional issues, and it also heals us on the spiritual level. We are impacted daily by many frequencies, not all good, some of which damage our sensitive energy fields and can influence our ability to think well and experience mental wellness and peace. Some come from energies of technology, mobile devices and electrical appliances, and they greatly disturb our systems and lower our vitality. Other energies impacting us include the low vibrational energies of humans, cars and machinery (their emissions and noises) and pollution. It’s quite confusing for us fitting into this industrial world and we have many areas of confusion about what things are and what they mean – noises of machinery, technology

and so on. Even more frightening to animals are the substances humans use (alcohol and drugs etc) and the distortions that they create. We struggle as animals to get along, to understand, to be part of something that should feel so beautiful but seems so chaotic and disturbing at times. We are here to help you but today I am reaching out to let you know what we face in our daily service to you and the Earth, and that we need this (UPACHP) to help us, and we need you to keep considering our lives, considering our daily challenges and loving us through them. We are so sensitive to energy that sometimes we don't understand fully what the source of the problem is, as it's often external and not related to us. We try so hard to be good to you, to give, to love unconditionally, to help and counsel you and offer our wisdom, but it's so hard here on the Earth at times that we struggle to just put one foot in front of the other and achieve anything that is in our heart. We ask you to continue to use this for us, and work with us very gently. We do need your help more than ever because without this tool we just won't get clear, and if we cannot get clear then we cannot perform our lightwork - which has far reaching consequences for everyone.

We leave you in love, we leave you with a request for your further consideration and greater understanding of our daily lives and the obstacles we face. Get deep into your hearts and pray for guidance when you work with animals as there are many reasons, beyond regular conclusions, as to why things are happening to us. We do need your support, in fact we beseech you for it. Without you we cannot perform our most beloved service! ~ Thankyou, Christos (speaking for himself and other animals)

Temple the cat

“We just want to feel peace. We love you and we want to work with you, to love you back to the reality we live in – one of divine harmony – but we also need support and maintenance to clear our own energy fields, work on what causes disharmony for us and generally receive support to just feel better. We at times become very out of balance, for various reasons – we pick up on group consciousness energies, are affected by electromagnetic fields and the energies of people and animals who visit our home. We do need a lot of help to feel peace and radiate that peace to those around us.

We are light-workers in our own right, we fix and repair the overall energy field of the collective, bringing in streams of light and love, and elevate our owners energy to reflect their divinity. That is why we come to sit with you when you are ill or down emotionally in any way. We see a lot clairvoyantly, which is so natural to us, and we see into the many energy structures and grids around each human being and the greater environment. From this we compose a direct energy remedy and apply it to your energy field through our bodies. We reflect to you the new reality and then you are able to download it into your own personal energy. This is how we go about our light-work, or love-work, bringing forward new energies so that you can relate to yourself and the outer world in new ways.

Those who keep animals as family members are truly blessed because it is in many ways the animals that are ‘keeping it all together’. Animals feel everything energetically that is going on and they respond immediately to remedy problems, helping to maintain harmony and positive energy. They have an exquisite ability of working with and understanding energy!”
